- **Total Storage Space – 8,000 m²**
- Containers Loading Platform – 500 m²
- Loading Bays – 3 Undercover.
- Open Yard – 4,000 m²
- WMS Online Stock Reporting.

Decanting & Filling

Import:

- Flexi-container decanting into IBC and stored either into Customs Bond or Free Storage.
- Lead time for decanting Flexi-container and road tanker into IBC's is 2 hours.
- Decanting capacity: 4 stations x 4 Flexi-containers (23kl) = 368kl per single 8-hour shift.

Export:

- Road tanker decanting into Flexi-container.
- Lead time for decanting is 1 hour.
- Decanting capacity: 1 station x 8 road tankers (30kl) = 240kl per single 8-hour shift.

Liquid Bulk Storage

Advantages:

- Liquid Bulk Storage Capacity: 10,000 m³.
- Bonded Storage = VAT & Duties on cargo not payable until product is required. (Better Cashflow Efficiencies)
- Import only the volume you need.
- Lower monthly volume therefore lower capital outlay.
- Only pay for the exact amount of space required. (IBC)
- Transport of IBC (34 tons per load) more cost effective.
- Easy to segregate multiple products.
- No contractual obligations. (Subject to space availability)
- Distribution Nationwide & Cross Border.

Integrated Supply Chain

Transport

- Bonded
- Local Container Cross-Haul
- Long Distance
- Cross Border

Customs Clearance

Computerized Inventory Control (WMS Streamline)

Bulk Minerals & Intermodal
